Case Narrative

Associated sample was received by Indo Laboratories from a registered agent in sealed container(s), labeled with unique identification number(s). Sampling was completed by the client; Indo Laboratories cannot attest to conformance with established sampling protocols.

Sample was analyzed as received and is reported in conformance with applicable regulations and guidance, with no non-conformances of note. PASS/FAIL determinations summarized on page 1 are based on limits established by the Commonwealth of Massachusetts. Reported results account for measurement uncertainty prior to assessment against established limits.

The extraction and analysis summary of all associated tests is as follows:

Cannabinoids – All analytes were extracted in solvent and analyzed by High Performance Liquid Chromatography (HPLC).

Microbiological Contaminants (except Mycotoxins) – Salmonella and Shiga toxin-producing E. coli (STEC) were analyzed by quantitative Polymerase Chain Reaction (qPCR) with confirmatory plating where necessary, while remaining analytes were analyzed by Most Probable Number (MPN) enumeration.

Mycotoxins - All analytes were extracted in solvent and analyzed by Ultra Performance Liquid Chromatography - Tandem Mass Spectrometry (UPLC-MS-MS).

Please note the disclaimer at the bottom of each page of this Certificate of Analysis. Indo Laboratories certifies that the information provided in this Certificate of Analysis is accurate and complete to the best of our knowledge.

All data contained in this report has been reviewed for accuracy to ensure all quality control requirements are met and conform with ISO/IEC 17025:2017. Results pertain only to the samples submitted by the client and shall not be altered, modified, supplemented or abstracted in any manner.
